

Instruction Manual

Product Identification Information

Product Name: LetMeCook

Application Type: Web App

Website Link: letmecooksofteng.web.app/

Version: v0.0.1

Product Specifications and Description

User Login page - Register with a new email and password or log in with an existing account. An email is sent for dual-factor authentication each time users log in.

Refrigerator - Tracks the user's pantry, ingredients are added, edited, or removed by the user. Based on the ingredients in the pantry, users can get recommended recipes that list what ingredients are being used and what ingredients are still needed.

Calorie Tracker - Users can add and remove meals to their log for the purpose of tracking how many calories they are in taking. They can type what food they are looking for into the search bar, and the Spoonacular API looks for the food automatically.

AI Meal Suggestions - Type in your daily calorie goal, your current calories eaten, your allergies, and dietary needs. Then simply click the AI suggestions button and the AI helper will automatically find suggested meals fit for you.

Meal Tracker - You can either search for recipes or add meals manually. Then simply add a date to the meal, and it will be added as a past meal, or a planned meal for the future depending upon the date entered. Past meals are not added to the meal tracker, but all meals are automatically added to the calorie tracker.

Preferences - You can also add preferences that are applied automatically when searching for recipes in the Meal Tracker. You can have a maximum of 20 preferences. When searching for meals, results will be filtered by user preferences, with the preference match results at the top and the non-matches below.

AI User Helper - Users can ask general cooking or nutrition questions through an interactive chat interface. The AI automatically references the user's Refrigerator inventory to provide personalized responses, and includes built-in multi-language support allowing users to receive assistance in their preferred language.

System Requirements - Can run a browser and is connected to the internet

Future Support - There is no current plan for future updates to our product "LetMeCook"™. If you wish to provide your own support, feel free to contribute to the project on GitHub.

Usage Instructions

Basic setup and getting started: Create an account. Enter your email (make sure it's an email that YOU have access to!), and create a password in the spaces provided. Then, when logging in in the future, be prepared to receive a 6-digit code emailed to the email used to set up your account and enter it in the space provided.

Core features: Once logged in, there's 8 different buttons to choose from on the dashboard.

LetMeCook

1.  Refrigerator

2.  Calorie Tracker

3.  AI Meal Suggestions

4.  Meal Tracker

5.  AI Helper

6.  Preferences

7. Change Password

8. Logout

1. The refrigerator keeps track of what items you have in stock yourself by entering the ingredient name and quantity. It also includes a recommended recipes button which will recommend you five recipes based on what items you have listed.

Your Pantry

Check ingredients and get recipes.

Your Refrigerator

1. cheese — Qty: 2

2. meat — Qty: 1

3. strawberry — Qty: 1

4. orange — Qty: 1

Recommend Recipe

-
2. The calorie tracker keeps track of your calories for the day by entering the food item and clicking "Search API", which will then add that item to a list and add the amount of calories to your total calories. You can remove items by typing them into the "Type item to remove" box and clicked the "Remove Entry" button.

Add to Log

Search Food Database:

Search API

Choose food:

- Apple: 95 calories
- Apple: 95 calories
- Strawberry and Chocolate Chip Panini: 523 calories

Total: 713 calories

3. The AI Meal Suggestions has labeled sections with examples of text to enter, such as daily calorie goal, calories eaten today, allergies, and dietary needs, and after filling these out and clicking "Get AI Suggestions," our LLM will give you a response with five different meal suggestions based on your answer.

AI Food Suggestions

Daily Calorie Goal *

e.g. 2000

Calories Eaten Today

e.g. 800

Allergies

e.g. peanuts, dairy

Dietary Needs

e.g. high protein, vegan

4. The meal tracker includes a search system for recipes by entering a food name into the top text box and clicking the "Search" button. Some different recipes will appear, which you can add by choosing a planned date to make the recipe and then clicking "Add to Meal Plan." You can also add recipes manually by entering the meal name, the date, and the calories, then clicking "Save Meal." All of these saved meals will show up in a list in the "Planned Meal" section at the bottom with the day planned to make the meal.

5. The AI Helper provides an interactive chat interface where users can ask general cooking and nutrition-related questions. By typing a message into the bottom text box and clicking "Send," users receive real-time assistance from the AI. A key feature of this tool is its ability to automatically reference the items currently stored in the user's Refrigerator to provide highly personalized responses. Additionally, the AI Helper includes a translation subfeature, allowing users to select their preferred language from the dropdown menu in the top right corner to view all chat content and advice in that language.

6. The preferences includes a drop down menu with cuisine, diet, allergy, and maximum cook time preferences, and by clicking on a preference type, you can then enter your specific preference for that type into the value text box. Then click the "Add Preference" to save it to your preference list, and recipe recommendations will take note of your preferences. You can remove a preference by clicking the "remove" button next to the preference in the list.

Preference Tracker

Your preferences are applied automatically when searching for recipes in the Meal Tracker.

Troubleshooting and FAQ

If something isn't working, like nothing happens when clicking a button, clear your browser cache and try again. If it still isn't working, please contact letmecook.support@gmail.com. Otherwise, make sure you have a stable internet connection.

Q: Does my account email have to be my email?

A: Yes! If you can't access your account email, then you won't be able to log in.

Q: What do I do if I can't access my account?

A: If you forgot your password, then you can contact support at letmecook.support@gmail.com. We don't currently have a forgot password feature, so we can work with you to get you back into your account.

Contact and Support Information
